ARANZA PALOMA HERRERA ARELLANO

Frontend Developer | Full-Stack Angular · ReactJs · TypeScript · Javascript · Java · .NET (C#)

Cuernavaca, Morelos, Mexico • paloma098@outlook.com • +52 777 340 0352 • linkedin.com/in/aranza-herrera-arellano

Portfolio: www.aranza-herrera-arellano.com

PROFESSIONAL SUMMARY

Angular Developer with 5 years of experience in HTML layout and in building modern, responsive and accessible web interfaces, designed from scratch —including prototypes and user experience definition— with Angular, Angular Material, ReactJs, TypeScript and Java, connected to REST APIs in .NET (C#) using RxJS. Specialized in UX/UI design, information architecture, user flows and reusable component architecture, with experience optimizing the performance and accessibility of pages and components. Experience integrating relational and non-relational databases (MongoDB, SQL Server, PostgreSQL) and using generative AI tools to speed up development, debugging and code documentation. Proven ability to work remotely with international teams in English, under agile methodologies (Scrum), with experience in project version control and collaborative work using Git.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), C#, Java, PHP
- **Frontend:** Angular (v15–v21) (signals, onPush, components, services), ReactJs (hooks, context, Redux), RxJS, HTML5, CSS3, Bootstrap, Tailwind CSS, GSAP, responsive design, Figma-to-Code, Angular Material
- **Backend:** .NET Core (C#), REST APIs, design patterns, scalable architecture
- **Databases:** MongoDB, SQL Server, PostgreSQL, MySQL
- **Data visualization:** GoJS, Highcharts
- **AI and productivity:** AI-assisted development with Claude (code generation, refactoring and documentation)
- **Testing and version control:** Jasmine, Karma, Cypress, Git, GitLab
- **Tools:** Visual Studio, JetBrains, Postman, Vite, Microsoft Teams, Browser DevTools

PROFESSIONAL EXPERIENCE

Full-Stack Developer — Process Ecology Inc.

January 2022 – June 2026 | Remote (international team, Canada)

- Developed full-stack enterprise applications for clients such as Suncor Optea, RT-X and EntropyIQ, measured by the continuous delivery of new features to production, using Angular, React, TypeScript and RxJS integrated with REST APIs in .NET (C#), paying close attention to detail.
- Designed interactive diagrams with GoJS, measured by the improved ability of users to edit complex industrial processes from a web interface, through reusable and scalable component architectures.
- Laid out and built real-time dashboards and charts with Highcharts, measured by the improved visibility of operational data for clients, through REST API integration and state management in TypeScript.
- Laid out and built responsive and accessible web interfaces with CSS and HTML, improving the usability and user experience of existing and new components by 35%.
- Improved the accessibility of web interfaces by 25% by implementing UX/UI best practices and by implementing and configuring SEO in web projects.
- Optimized frontend performance, measured by the reduction of unnecessary renders, using Angular Signals, the OnPush strategy and reactive programming with RxJS.
- Developed and maintained Web APIs in .NET (C#), measured by data consistency across three database engines, through data modeling and migration between MongoDB, SQL Server and PostgreSQL.
- Accelerated development, debugging and documentation tasks, measured by the reduction in technical task resolution time, by using Claude as a code assistant in the daily workflow.
- Raised the quality and stability of the interfaces, measured by the reduction of errors reported in production, by implementing unit tests with Jasmine and Karma.
- Collaborated daily in English with international teams, measured by on-time sprint delivery, through version control with Git and agile methodologies.
- Implemented web interfaces from Figma designs and prototypes, turning visual specifications into reusable, responsive and functional frontend components using Angular, TypeScript, HTML and CSS.

EDUCATION

Computer Systems Engineering (Degree Awarded)
Instituto Tecnológico de Zacatepec | 2016 – 2021

LANGUAGES

- **Spanish:** Native
- **English:** B2 — Speaking, writing and reading (Basic English 2: Pre-Intermediate, King's College London, 2021)

COURSES AND CERTIFICATIONS

- Angular: web application development with components, services and modular architecture — Udemy, 2022
- ReactiveX: RxJS — reactive programming and asynchronous data stream handling
- Unit testing with Jasmine and Karma — Udemy, 2023
- GSAP (GreenSock): smooth interface animations and interactions — 2026
- Mobile App Development — Google Activate, 2021
- ReactJs – Udemy 2025

COMPETENCIES

Teamwork, problem solving, active communication, self-taught, adaptability, attention to detail, critical thinking, proactivity, time management, continuous learning.
